## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3 are, drawn to a space heating system, classified in class 237, subclass 19.
  - II. Claims 4-27 are, drawn to a method for controlling heating operation, classified in class 126, subclass 116A.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed in claim 4 can be carried out by other apparatus, e.g. tobacco dryers. No multi-stage furnace is required in claim 4. the apparatus claim 1 can be used to perform other process, e.g. green house ventilation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3749

5. During a telephone conversation with William O'Driscoll on 11/9/2004 a provisional election was made with traverse to prosecute the invention of Group II, claims 4-27. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-3 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### *Claim Objections*

7. Claims 20-27 are objected to because of the following informalities: Are claims 20-27 apparatus claims or method claims? Claims 20-27, line 1, the claimed "invention" shows no antecedent basis. It is suggested that the applicant to cancel "invention" and insert "method". If they are method claims, there should be a series of active steps recited. If claims 20-27 are apparatus claims, then, they should be depended from a preceding apparatus claim 1 or 2 or 3.

Appropriate correction is required.

#### *Allowable Subject Matter*

8. Claims 4-19 are allowed.

***Conclusion***

9. This application is in condition for allowance except for the following formal matters:

(1) non elected claims 1-3 which withdrawn from consideration;

(2) objected claims 20-27, see above paragraph 7

Prosecution on the merits is closed in accordance with the practice under *Ex parte*

*Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
